Convert123 is a simple-to-use software application that allows you to convert numerical values from one measurement unit to another. It offers support for acceleration, angles, liquid measure, temperature, pressure, power, velocity, volume, and so on. Hassle-free installation and intuitive GUI The setup procedure does not take a long time to finish. As far as the interface is concerned, Convert123 adopts a normal window with a clear-cut structure, where you can get started by selecting the measurement type, along with the source and output unit. Convert measurement units easily All you have to do is enter numerical values in the dedicated boxes and click a button to immediately perform the calculations. In addition, Convert123 puts at your disposal an advanced calculator and lets you export results to file, print them, copy them to the Clipboard, or immediately send them via email. Customize app settings It is possible to change the font size, use a thousands separator in the results, switch from US to European format, as well as reset all settings to their default values with the click of a button. Evaluation and conclusion Calculations are immediately performed, while Convert123 remains light on system resources. We have not come across any issues in our tests, since the tool did not hang, crash or pop up error messages. All in all, this lightweight program comes in handy to anyone who frequently needs to convert between multiple measurement units. From the brand-new Nintendo Labo VR Kit comes a new fun Nintendo Labo: Card Builder VR Experience to help you build your own custom cardboard Toy-Con collection and play them in virtual reality. Have a mission to accomplish in Card VR? You can play as Princess Leia and complete it by exploring the Death Star in VR. First, start out by

cutting and designing your own Toy-Con to build and play with. You can even collect the entire collection! Using a Toy-Con + Nintendo Labo: Project Crane, get to the Death Star and meet X-Wings. They're just an Imperial interceptor away in VR. You'll find yourself in VR without a controller in hand. Come in and out of the Toy-Con. Find the weapons and play with them. First, build a "structural" Toy-Con around these tools. Fold it in a designated way to add new parts to your Toy-Con. First, find a place to
