### What's New in the HUPlayer?

HaihaiSoft HUPlayer is a handy media player for users in search of a lightweight app. The program does not affect system performance and can be used by inexperienced users thanks to the easy-to-follow interface. Supported videos: HUPlayer can be used to play various online/streamed/received videos. 3GPP, AVI, MP4, Xvid, MP3, WMA, Divx. Also, HUPlayer supports many media formats, such as 3GP, RM, 3GPP, MP4, AVI, WMV, FLV, SWF, mpg, MPEG, MOV, MP3, H.264, and so on. Function and Features: 1. Create previews from media playback This is the most convenient function on HUPlayer. You can press Ctrl key and then click the stop button to create a preview. HUPlayer will switch to Window mode automatically, give you the option to save a snapshot of the video as a PNG or JPG file. 2. Flip video pages or zoom HUPlayer can flip or zoom the video as well. You can flip each page or zoom into specific regions of the video. The user interface is very simple to work with, and all required settings can be done from the navigation bar at the bottom of the screen. 3. Change video volume/channel/access settings Control the video volume or switch it on or off via slider. HUPlayer supports video player filters so that you can customize the player with your favorite player filters. On this application, you can choose between automatically rendered timeline, auto rewind, repeat, and shuffle. There are several settings for those who like to view videos in a large screen mode, and you can also change the aspect ratio and duration of the video. 4. Set instructions for the video player You can set the video player position manually for playing videos in background mode or set your video player to always be on top of other windows. You can choose whether the video player can show the video or not while other apps are being used. HUPlayer can be set to automatically play video each time you start the program or at specific intervals. You can also define the playback region in case you want to play specific pages in the video. 5. Create action after player playback After the playback, you can create the action in your taskbar or tasktop. You can add the video as a favorite to play it again and again
