The Adobe Photoshop Express app takes advantage of cloud computing, creating a "living image file library" with templates and designs for you to access. Photoshop Express is a web-based software, so it can run on your computer and any

supported device, from laptops to tablets to smartphones. To use Photoshop Express, log in to your Adobe ID account, which is the default for the web-based app. If you haven't set it up yet, select Adobe Photoshop Express when you create a new project. You'll have access to all of your Adobe ID projects, including saved files, fonts, brushes, and Smart Objects. Like the app, the web-based tool also has some of the same limitations as standard Photoshop. You can't edit existing images, but you can create new files by cropping images and even importing them as a RAW file, as well as using all of Photoshop's features to adjust color, contrast, and more. Web developers can take advantage of the familiar web interface to generate pages with extra web design tools. When you're done editing, you can save the results directly to your computer's hard drive. This makes it easy to use Photoshop Express offline and it won't run out of space like a standard Photoshop application does. a681f4349e
