Modaris is a software system for creating high-quality 3D models of garments and product components directly from 2D patterns. The software is optimized for CAD systems, such as Diamino HX, and lends itself to working with 3D meshes directly, offering a user-friendly interface without the need for a 3D CAD system. Lectra Modaris V8R1 is a high-fidelity platform for CAD, with the ability to export virtually any item as a digital pattern. Modaris supports services which pull information directly from the CAD system used for rendering. It includes an offline rendering engine for fast simulation and a powerful measurement instrument, which lets you measure and fit components and garments accurately. Lectra Modaris V8R1 will be available in February 2017. There were a record 367 hate crimes reported in Mississippi in the first half of the year. In North Carolina, there were at least 176 hate crimes in that period. In Kansas, there were at least 112. Mississippi, Kansas and North Carolina are among the nine states where the legislation includes broad exemptions for religious institutions, such as churches. "I'm very concerned that it 1cb139a0ed
