What's New in the EmailSpoofer?

EmailSpoofer is a simple email spoofer and windup tool that can help you fake your email address. Send family and friends joke emails and wind them up like never before. Send your family and friends emails from the Queen or President Obama.

---

The possibilities are virtually limitless with EmailSpoofer. Why not email your boss and tell them they are up for a promotion to director and see how they react. EmailSpoofer comes with a quickstart guide that will have you up and running in minutes. With step by step pictures and text, even the most computer novice will be able to use our program. Extras You can add an html signature to a message with a built-in

---

Dreamweaver sample file and get it automatically inserted in messages at the end of every message you send. You can also add a personalized message to anyone you send a message to with the Message Selector feature, which lets you choose individual or all recipients, a date range, individual messages or groups (e.g. "New Users" and "Old Users"). The sender profile settings lets you create custom sender profiles, including

---

description and comments. The e-mail checker feature lets you quickly find the return/error code of any messages you send, plus the full headers and body of any messages that have failed, letting you get more precise information about why a message failed. Easy Calender Pro Easy Calender Pro is a fully-featured, easy to use calendar software system for the Macintosh. Easy Calender Pro allows you to put calendar

---

details into many standard calendar and journal files and print calendars and journals. Each task list is assigned a color and each event is assigned a flag color. Colors are used to identify the status of a task and/or event, any hint flags are used in flags to display the hint for your next task. All events can have the "hint flag" set or none at all. More than 40 task and event types can be set up, each with its own set of

---

attributes. Fax Master for Mac
