Ratings Best Power Saving Software This is one of the best Power Saving Software available for our platform and we have tested this software and we are pretty sure that you are going to love it. The software is called Electric Power Cost Calculator and it was created in order to help users calculate how much they can spend when it comes to electricity. The software has a simple and intuitive interface which can be described as plain and simple. It consists of a few boxes, a menu bar and a few drop-down menus. The setup process is pretty easy as well. It is only a matter of copy and paste the software files. The Windows registry and Start menu/screen are not going to suffer any changes, and it is not going to leave any kind of remnants on your hard disk after you delete it. It is a pretty efficient piece of software. This software is also portable. You can easily copy the software files to a USB pen drive and run it on any computer you want. The software does not hamper your computer's performance, the response time is good, and the interface
