KEYWORDS: Did you know that many photos taken by a digital camera are not saved with the original name? If you are trying to find the photo you are looking for, the keywords may not help you. I would like to call your attention to an important fact: keywords are very sensitive to minor

modifications to the photo, and sometimes the keyword is deleted even if the photo remains. In order to solve this problem, Feather Photos Theme does not use any keywords in the photos and videos. There are NO photos in our theme without a description, so you can always find what you are looking for. **SWIPE & FLIP PHOTOS:** Feather Photos provides a full screen mode for you to easily view your photos and videos. You can not only enjoy the photo gallery, but also check out your videos. You can enjoy your favorite photo or video as well as browse the latest collection in just a couple of seconds. Most photo editing software allows you to rotate, flip, sharpen, straighten, resize and more, just like your original photo. This theme also supports a list of 4 different "tools" modes for you to easily access them:

"swipe" mode, "flip" mode, "rotate" mode, and "move" mode. PHOTOS & VIDEOS: Feather Photos Theme supports playing videos in both AVI and MP4 format. You can even watch videos in WAV, AIFF
