A fun and playful cartoon-inspired icon set for your personal, work, and educational needs. The icons make use of flat and strong colors for emphasis and simplicity. 4. SocialBookmarksCleaner-Deep Scan (Version 3.0.0.0.0). SocialBookmarksCleaner-Deep Scan is an extension to the SocialBookmarksCleaner which allows you to perform a deep scan of your internet content to find, identify and then clean up all the referring links used in your Blogs, Forums or Magazines. SocialBookmarksCleaner-Deep Scan is an easy and fast way to save a lot of time, connect with more people, and produce better web content. SocialBookmarksCleaner-Deep Scan gives you the opportunity to find more backlinks on your blog posts, add more keywords, and choose more targeted keywords. 5. HackerEye for SharePoint 2010 SP1 HackerEye is a SharePoint 2010 security tool designed to allow you to quickly identify and resolve holes on your SharePoint Server. 6. Sabido - SharePoint - Office - Security Sabido is a SharePoint 2010 security tool developed by Sabido Software for Microsoft SharePoint. It is a report database driven security solution that allows you to quickly identify potential security issues and protect your SP sites by spotting the source of malicious attacks. Sabido protects the most security critical areas of SharePoint by default and provides a complete access control framework that allows the administrator to assign permissions to different users, groups and computer resources. Sabido provides a three way approach for creating, managing and monitoring your protection settings. In one click configuration of new sites and users is painless and no expertise is required: you can add users, groups and computers to the protection schema based on predefined rules and compare all your sites security policies with a single click. Sabido is a powerful code scanner that allows you to instantly check the code of any website, web application, or file. The web page is scanned for security holes and the findings are shown on a simple but complete web page. The results can be delivered in HTML, VBscript, ASP or as a text file. Additionally, the code can be copied to the clipboard and pasted into a text editor where it can be further inspected or into any 3rd party security assessment tool to be scanned even further. The user interface is intuitive and it includes icons to describe the most common features

System Requirements For FriendFeed:
