Autodesk's latest version is AutoCAD Crack Mac R14.0. Typical uses for AutoCAD are architectural and mechanical design, engineering and construction, and the drafting of blueprints. AutoCAD is best known for the industry standard xrefs that reference all drawings in the file. AutoCAD also allows for the simultaneous rendering of 3D objects in the model. How do I install AutoCAD? The Autodesk AutoCAD 2010 User Guide is available for free download from the AutoCAD Autodesk website. For a list of compatibility information, download the AutoCAD 2010 Compatibility Guide. Q: ElasticSearch + Tire returns only some "field values" I want to query ElasticSearch and return the fields. I have a single index. I have indexed few string fields in that index with a few different values, but I'm seeing only some fields are being returned. I have this simple code that returns me only one string field, but it's supposed to return all the fields.

```
Tire.search "events" do query do term 'A' end size :global if params[:city] add_operator :or end if params[:zone] add_operator :or end if params[:country] add_operator :or end end
```

Here's the ElasticSearch console:

A: You need to index your string fields (as inverted strings) with the "analyzer" option. So for example:

```
PUT my_index { "settings" : { "analysis" : { "analyzer" : { "my_analyzer" : { "tokenizer" : "my_tokenizer" } } } }, "mappings" : { "my_type" : { "properties" : { "field" : { "type" : "string", "analyzer" : "my_analyzer" } } } }
```
