What's New In Pinout Master?

Pinout Master is a useful application that helps you to find out all required information quickly and easily! This is a unique application developed to make your work with wire connectors and cables much easier. The application is designed in such way that it is possible to find various information from one place (which is not so simple). You have access to the Pinout Master window from any application or the Start Menu (Internet Explorer 6 and above). You can easily find out what kind of connection is required and what wire is to be used for it. The application supports the following connections: Simply open the window and you will find out what is needed. To get all needed information, click "get the pinout". To go to the next connector, use "next". "Next" button will open a new window with a new pinout diagram. Supported languages: English, Russian, Bulgarian. Screenshot: As you can see, Pinout Master has the following features: Search: Search function allows you to locate any desired information quickly and easily. User notes: You can set the "User notes" and keep them in the application, so you will always have the information, which was necessary for you! User notes will not be saved on the computer but on your phone. Printing: Print Pinout Diagrams! You can print out any diagram from the program. IMPORTANT NOTE: This is a beta version of the application and its testing is not finished! If you use this version of Pinout Master, you have to keep in mind that I am not responsible for any damage, which can be caused to the application or your computer! User-friendliness and fast execution rate of the application were the key for its development. Pinout Master is quite easy to use, even for those who have never used it before. If you are the owner of a device with an EmLINK connector, you can find out what is needed for connecting it and to which cable to use it. With "Pinout Master", you will never have a problem when you are working with cables and connectors. How to install Pinout Master? You can install Pinout Master either as a portable app or as a desktop application. If you wish to install Pinout Master as a portable app, simply save the file into any folder of your choice and then run the installer. After the installation is completed, a shortcut for Pinout Master is added to the start menu of your computer. When you have the "Pinout Master" application installed on your computer, you will find Pinout Master from the Start Menu. If you wish to install Pinout Master as a desktop application, simply open a Windows Explorer window, go to the folder where Pinout Master is
