Norton Safe Web Plug-in Lite [Updated]

Norton Safe Web is the first online search of all of its class, featuring greater accuracy than its competition. Safe Web uses a combination of Norton AntiVirus' proprietary Anti-Malware technology, a brilliant, fast page scanning engine, and SafeDNS, the all-knowing online domain checking tool. It finds bad Web sites before you do and stops them before they can hurt you or steal your data. Convenient automatic updates The search results are presented by Norton Safe Web Plug-in Lite as a rectangle logo, with page information being displayed under that. The height of the rectangle can be adjusted and narrowed to display the necessary amount of information. The information displayed provides a helpful description regarding what the page is all about, and includes whether it is a safe or dangerous site, as well as a link to the related site. Uses the latest technology The advantages of Norton Safe Web Plug-in Lite over its competition include its use of the latest Anti-Virus and Anti-Spyware technologies, and the fact that it handles any Internet Explorer in use, regardless of version, without the need to be installed as a separate executable. Features a user-friendly interface Once you have activated the tool for use, a toolbar will appear at the top of the main window. This includes two functions, 'Norton Safe Search' and 'Norton Safe Web Settings', with each of the two buttons being accompanied by an on/off switch. Letting you access information regarding the status of the website you are interested in, 'Norton Safe Search' will use the Norton AntiVirus engine to locate and compare a similar page (based on the URL) in order to check whether it poses a threat to your computer or not. The results will be displayed as a square icon. This means that the page in question has been scanned and secured to execute online transactions, while 'OK Norton' signals that the page is safe to browse. The 'X' icon informs you that certain risks have been encountered on that page, whereas the '!' sign alerts you that the threats posed by a website are of a low level. The '?' icon translates into a untested web page. Perform protected searches on the web 'Norton Safe Web Settings' gives you the opportunity to fine-tune the functionality of the tool to make it as effective
