Recently, we came across an application called DiskCryptor 1.5.7.10, a piece of software that claims to make your laptop hard drives private and seemingly free of any kind of noise. This is quite unbelievable, especially when one considers the fact that the application costs $50. It should be noted that this program has a biannual license, however, and using it on any one device at once will incur a monthly fee, and you can upgrade it to a one-time fee only.
