WinAuth is the combination of a serial code authenticator and password manager that uses a pairing of these two core features to protect and keep your credentials safe. This software provides you a safe solution for your logins, giving you a unique code with which you can log into any account you want, by simply entering this code in your password manager and the program will automatically generate that code for you from any one of the list of all available gaming and other accounts you may have. After entering this unique code, your login will be verified instantly and you'll have no other option to login. WinAuth key features: Enable or disable an option to automatically hide your serial code from the screen after entering the unique code (if enabled, you can hide the displayed serial code with a button, in order to keep your info safe from prying eyes). Able to use any one of the available authenticators/machines/keyboards you already own to generate your unique code. If you have more than one gaming account or some other services, this application will give you a unique code for each and every account or service you have. Just add all the accounts you want to protect and the software will generate the unique code for you. Create your own list of accounts to use the software for. Export all your accounts to a TXT file with one unique code per line. Add the authenticator you are currently using for your MMORPG gaming accounts.
