What's New in the Kirby 039;s Pink Dream?

Kirby's Pink Dream is a skin dedicated to Trillian users, which gives them the possibility to apply a pink look to their instant messaging application. This is inspired by the "Kirby's Dream Land" video game from the Kirby series, owned by Nintendo and initially released in 1992. The package downloaded from Softpedia contains a small-sized.tsz file that weighs under 200KB. This file cannot be opened with any associated application. However, there is no setup kit involved either. Instead, you can copy the file to the "skins" folder of Trillian's installed directory. It's not necessary to dig deeper into the subfolders to find a spot for this tool. In case the instant messenger is already running, it's necessary to restart it to finalize setup and gain access to the new skin. It can be selected from the "Skins" menu of the "Trillian Preferences" panel. It shows a message to ask you to restart the program to complete the skin changing operation. There are no customization preferences available for Kirby's Pink Dream. The pink theme is applied to the main window, including menus and buttons, but it doesn't affect additional windows you open, such as the preferences or activity history panels. Kirby's Pink Dream Review: - Not the best skin, but still nice - pink windows - pink menus - pink everything - nice for users of Trillian (but it's also possible to change Trillian's standard skin) FAQ: - How can I use this skin? You have to copy the provided.tsz skin to the "skins" folder of Trillian's installed directory. It's not necessary to dig deeper into the subfolders to find a spot for this tool. - Will this replace my current skin? No, but it's possible to use both skins together, since each one is installed in a separate folder. You may choose to install the skin if you prefer the pink look. - Can I remove the pinkness from Kirby's Dream? No, but you can find a skin named "Kirby's Dark Dream" that suits your preferences. It provides a black and dark gray look. - Can I uninstall this skin? No, you cannot uninstall the skin, but you can remove the skin using the "Remove Skin" option. Your vote is counted! Thank you for participating in the discussion. * Please discuss why you liked or disliked the skin and what you would do to
