The Gradient Tool allows you to draw custom gradients for any area of the image. The Gradient Tool can create linear or radial gradients. The Eraser Tool allows you to erase a section of an image. It can be used for retouching your pictures, or to delete unwanted objects from the image. The Eraser Tool can be combined with the healing brush, and also works with the fill and stroke tools. The Marquee Tool allows you to select a rectangular area on your image, then create a selection around this area. This selection can be removed, or altered to include or exclude other parts of your image. The Pen Tool allows you to draw various designs, shapes and objects on images. The most common shape drawn with the Pen Tool are rectangles, but it can also be used to draw curved lines, and freeform shapes such as stars, polygons, circles and ovals. The Pen Tool can also be used to draw text. The Spot Healing Brush can make corrections to small areas of an image, or to blend between two images. The Lasso Tool can be used to make an initial selection, or used to make a more precise selection of any shape. The Typography Tools are used to add text to images. In this section we explain the various Typography features included in Photoshop, including the Text Tool, the Type Tool, the Type Picker, the Layer Style options and Adjustments panel, and even the Characters panel.
