Tiff Transfer Pro is a tool that allows you to transfer (or convert) images, photos or archives between digital cameras, scanners, printers, mobile devices and computers. You can transfer images and documents for backup purposes, and even recover deleted images from cards and hard drives, using this software. You can also quickly scan the pictures from your mobile device and store the results into the computer hard drive, make digital copies of the images, or even edit the files. The tool integrates with Windows Explorer and Microsoft Outlook, and is compatible with most image formats, including BMP, GIF, JPEG, TIFF, RAW, PNG and others. When you scan a document, it is automatically saved into the files library or as a print, according to the settings selected for the task. You can perform most of the actions in batch processing. This means that you can add a whole folder or all the images or documents into a queue for processing in one go. You can select the image size and compression, and modify the picture parameters. Transferring images is supported by a timer, which lets you control the start and finish of a transfer. The application is easy to use and to navigate, so even first-time users will be able to make a job using the software. The program has a large collection of image and image processing tools, including adding text to the pictures, cropping, photo transformations, backgrounds, enhancements and more. The program supports batch conversion and resizing, performing multiple operations on one image at a time. After the job is finished, the program automatically generates thumbnails for you. The interface is simple to understand and you can save the images or documents into the computer hard drive by using the "burn to disc" option. The software is compatible with most types of digital cameras, scanners, printers, mobile devices and computers. Other features include a large documentation with screenshots, an automatic backup function, an option to send your job results by e-mail, and image and document recovery in case you delete some or all the files. You can update the program when it is made available, based on your request or by using the auto-update option. The software is free to use, and it has a positive rating on the site.
