[DZINE.PL] What is so wrong with Total Commander and its interface? DZINE.PL Tutorialz: Getting a good interface is not all about expensive programs and fancy 3D graphics. To me, Total Commander is one of the most underrated applications on Windows. Its interface is simple, and yet at the same time it doesn't look plain or boring. And its functionality is pretty much fantastic. It has got many key features and functions, which makes it an ideal tool for file management and management in general. Total Commander is one of the coolest utilities, which helps you to find and change virtually all kinds of settings and files. That's why I decided to create a tutorial on how to install and use Total Commander like a pro. First of all, I would like to introduce you to Total Commander, which can be found in the Microsoft Windows directory. The main window has got a classic interface. Its menu (above the file list), which contains various actions, such as Go To Current Directory, Show List, Open Directory, and many more, looks like this: The interface of Total Commander is, as the name would suggest, totally customizable. Most of the aspects can be changed, e.g. the position and size of different menus, the window borders, the icons in the application. You can even change the color of each icon, so that your file manager will more closely resemble your favorite Windows application. And most importantly, you can also change the look of all the lists (file, directory, and registry) in a completely different way. Now let's have a look at the functions on Total Commander. There are two kinds of them: Global functions and
