Extreme WoW PVP in my opinion is a game changer! Counterstrike/Counterstrike Condition Zero may be the worlds greatest online FPS game but I dont think it is even close to WoW. The game is how you like it. An FPS game takes on a whole new meaning when your there running through a magical world of hundreds of other players, just waiting to kill you. For World of Warcraft that means twice as many portals and no more fear of running into trash mobs. WoW PVP is a game that is for the true WoW player. PVP is a vital element that adds to the WoW experience. I am running a very unique PVP server. Pvp1.Pvp1 is PVP for more then just the PVP. I allow the PVP to be more aggressive then it would be in typical WoW PVP. This means hits, stuns, special abilities, and more can be used on the run. All of this allows for even bigger battles. Pvp1.Pvp1 is primarily a weekly tournament, that takes place on a weekly basis, from the 30th July through to the 27th of August. However, it is also open to players wishing to enter and try their luck at the weekly tournament. This all in mind, we have been having a great time running Pvp1.Pvp1. Its a unique event, we dont normally have trashing the opponents town go from the server, but this is not needed. The PVP end in one of two places

BlueTunes (Updated 2022)

Editing a music file in iTunes cannot be done with the remote control so we made this program. Essentially, BlueTunes is a remote control for your computer music library. Using bluetooth technology, your remote will allow you to control your music collection from up to 50 feet away. Use a wireless keyboard or mouse to control your playlist and the remote to control your audio player. BlueTunes allows you to control your iTunes music library using a Nintendo Wiimote, a USB Bluetooth adapter or any Bluetooth compatible device. Comedian Adam Carolla has helped make the perfect nacho cheese at KFC. Not only did he concoct a tasty pairing for a Colonel's requested ketchup nachos, he looked like he was actually sweating while he was doing it. Apparently it's Carolla's first day on the job, and he went all out and put on a big show for his press visit. "I got to go in and change the lighting and all that," he said. "We're gonna have to get some chickens in there to help and lay down some chickens." The 35-minute reality show followed the production of the KFC nachos as Carolla made them to the accompaniment of his co-workers. I just might watch the whole thing on YouTube one day. RELATED: BEST. What's New in the BlueTunes?

Overall, the Bluetune system is well made, inexpensive and easy to setup. There were some minor issues with the Wiimote becoming uncomfortable during use. It's a worthwhile idea to invest \$15 to get a better Wiimote. Copyright 2007 BlueTunes. All rights reserved.
