Hi everyone, Just wanted to know if it's possible to deploy Apple HLS encryption on wowza server? If so, can anyone point me to a thread... ==

=====

===== I'm using wowza server and i don't understand how to set up encryption as codec. I have tried a couple of different encoders to no avail. I found this and tested several

different versions to no avail. I can see that it can play HLS, but when I try to use it to play HLS with wowza server, it only works with HLS video. What is HLS. =====
