
3dmax Sweep-Profile Shapes Vol.1 34

Threads: 1. Joined: July 2017 Dear Kstudio team, thanks for your great plugin, it makes our life so much easier. My script includes a plugin script that is called when the window is called, so I created a new window and added the plugin to it and everything works fine. However, since I'm new to this area, I'd like to know what happens if I first exit the window and re-open it from the menu. How will this affect the plugin that calls my script? Will it overwrite existing data? Or is there some other change I would have to make to avoid this?
