## DESlock+ Reader

DESlock+ Reader is the official decryption tool for the very popular DESlock+ encryption solution. If you want to send a file that you have encrypted using DESlock+ to someone else, this is the tool that will let them easily unlock it. Also, if you have DESlock+ encryption keys and want to send them to your interlocutors, DESlock+ Reader makes it possible to instantly decrypt the content, which is already ready to be shared. A minimal installation size of only 16 kB is the prerequisite in order to fully benefit from the application. Only this tool is required. Please note that DESlock+ Reader requires .NET Framework 3.5 or better to run. This download includes a low-level access analysis (LLA) utility which will update low-level access hashes (LLA-Hashes) of executables on the computer. This is a routine update of the existing file hash database. This utility will scan the system in search of specific .NET assemblies and is designed to help with tasks related to the detection and removal of known malicious software. Highly recommended! Highly recommended! Highly recommended! DESlock+ is an award-winning encryption tool that is now owned by ESET, providing an all-in-one solution for securing individual files and folders, emails, local and removable drives, text pieces, and more. To make it easier for users to share encrypted content with others, its developers have created the DESlock+ Reader. This install-free application can be used by anyone who receives encrypted content and wants to unlock it without having to install DESlock+. Reveals content that was encrypted using DESlock+. As stated above, the purpose of DESlock+ Reader is bluntly simple: to allow the quick decryption of data. The goal is to get a hold of the original content without effort in the shortest time possible. That is the reason why DESlock+ Reader requires no installation and comes with a one-window interface that makes it extremely user-friendly. The GUI comprises a simple text box where the encrypted content has to be pasted. DESlock+ Reader works with encrypted text, email content, and attachments, but keep in mind that you have to paste the entire encrypted content, starting with the beginning of the message and going all the way to the end of it. Works with data encrypted using a password, not an encryption key. It only takes the push of a button for DESlock+ Reader to start decrypting.

### What's New In DESlock Reader?

Share files with your friends and family without revealing the original content. DESlock+ Reader is a simple and intuitive interface that makes it possible to quickly and easily decrypt files that have been encrypted using DESlock+. Because the content is encrypted using a password, it is very important to use an accurate passphrase to unlock the content. Once the encrypted content is pasted, DESlock+ Reader will show you the original content. You can choose whether or not to share the decryption passphrase with the recipient. It is important to note that unlike the official decryption tool for DESlock+, DESlock+ Reader requires no installation. DESlock+ Reader requires Windows Vista or higher.
