Anybody know when the Excel Icons collection will be updated for 10.0? I already have the 10.0, 11.0 and 12.0 collections installed. I am using VS2012 for my development and workstation. I would like to be able to use the 12.0 collection with 10.0. Comment As of Microsoft Office 2012 the only high quality Excel icon package available is the Excel 2010 Icon Resource Pack which provides both Excel 2007 and Excel 2010 icons. The project also includes a set of custom Excel 2010 files with more than 200 icons. They are included at the end of this article. You can use them for the icons for Excel icons you need to download. When installing the Excel 2010 Icon Resource Pack to a Visual Studio 2012 IDE it may cause some issues which you need to resolve. Here is the information I found on the Microsoft Support help pages: If an error occurs when you try to open a project for development in Visual Studio 2012, you can fix this issue by using the following steps: Open a Windows Explorer window and go to the location where you installed Office Tools for Visual Studio Go to the vs\VisualStudio\packages folder and find the folder containing the Excel icon resource pack, such as OfficeTools2012_32Bit_1_3.0.4.3_MicrosoftOfficeIconCollection.dll Copy this file and paste it on your hard disk drive, for example, in your C:\Users\Documents\Visual Studio 2012\Projects\Microsoft Office icon set 09e8f5149f

The choice to use the PNG format was based on the fact that it supports alpha channel transparency which improves the GIF transparency model. The Microsoft Office 2007 icons package contains more than sixty high quality images that depict the icons used by the different Office programs included in Microsoft Office 2007. The package includes more than seventy high quality images captured in PNG format. Both the icon size and the file format are suitable for transferring the images over the Internet and using them for websites. It is a useful tool for the programmers that need to create icons inspired from the Office programs and for the web developers that create websites with Office-related themes. The PNG format is suitable for both purposes since it uses a palette based algorithm to compress the data while maintaining a small footprint. The choice to use the PNG format was based on the fact that it supports alpha channel transparency which improves the GIF transparency model. Unfortunately, not all the programs from the suite are represented in the collections since there are no icons extracted from Visio, Project or SharePoint. To make up for this downside, the most popular applications such as Excel and Word are represented with more than ten images. The Microsoft Office 2007 icons pack is a useful resource for the users that need to insert Office-related items in their projects. Microsoft Office 2007 icons
