Q: Formula to calculate elapsed time? I have a form for a website. I have a start time of 00:00:00 and end time of 23:59:59. On the form there is a textbox for the user to enter a timespan that the request to my web server will take. What's the best way to calculate the elapsed time? A: You could use a DateTime variable and use a Timer Event to update the elapsed time. Dim StartTime =

DateTime.Now Dim EndTime = DateTime.Now Dim ElapsedTime As Integer =

EndTime.Subtract(StartTime).TotalMilliseconds If the elapsed time is more than a specified amount of time, e.g. 5 minutes,

then you can do something like: Dim ElapsedTime As Long = EndTime.Subtract(StartTime).TotalMinutes Dim

ElapsedTimeSeconds As Long = EndTime.Subtract(StartTime).TotalSeconds And then based on the elapsed time you could set

an exit point if it exceeds a certain amount of time. Owen Good The Big Chill The Blacklist Blindspot Boston Legal Boomtown
