Talking Desktop Clock Full Version Download

Do you ever find it frustrating to keep track of the current time? Time, in this day and age, is a crucial resource. From burning a candle to say hello to your colleagues to the reliable update of an email, it is always a challenge to find the right time to do all of this. Talking Desktop Clock is an application that is designed to make this task easier. It is capable of alerting you every minute and is very flexible. You can choose exactly when to be alerted and decide for your own preferences. Unhappy with the current desktop clock? This program brings an entire new dimension to the desktop clock. With just a few mouse clicks, you can change the desktop clock to any design you want to use. What's new in this version: You can now set the time of day at sunrise and sunset! User review: Write a review Reviews All reviews are from people who have downloaded this software. G Gordon Levitt 13/11/2007 5 Best Clock EVER!!! This software is unbelievable. I spent 4 hours trying to figure out how to make the clock my screen saver but i couldnt. Then i looked on youtube and found this forum, and now im the happiest man ever because this software is awesome. If u cant figure it out then download a color customization program like graphics for windows and then the schedule colorizer and it will take like 5 min. If you have any questions or comments please email me at gordon@sly.net M M 13/11/2007 5 Easy to use I had used this software and this is the best I've used. You need just to learn and then you can use it. This software is very easy to use. N Nalini 11/03/2007 5 So Good :) I absolutely love this software. When I started using it, I was an hour behind, and now I am one hour ahead. This product does an amazing job. An angelina 07/28/2007 5 My favorite :) I tried other programs with the same idea but they were just a piece of junk. This one has so many features and I've never gotten tired of using it. This program is great. I always use it when
