songsQ: Automatic redirection of a subdomain to a specific page To me, this seems simple. But it isn't. I have an active domain
and I want to redirect to a specific page when someone accesses a subdomain from a certain IP. And I want it to be done
automatically, to be as easy as possible for the user. A: Try the following in.htaccess. RewriteEngine On RewriteCond
%{HTTP_HOST} ^subdomain\.example\.com\$ [OR] RewriteCond %{HTTP_HOST} ^www\.subdomain\.example\.com\$
RewriteRule ^/?\$ /subdomainpage.html [L] package healthcheck import ("fmt" "net/http") // StatusUpdater is responsible for
updating the status of the web server type StatusUpdater interface { // UpdateStatus updates the status of the web server
UpdateStatus(error interface{}) } // ListenerInterface is the interface we implement in order to get a health check // status type
ListenerInterface interface { // GetStatus reports back the status GetStatus() interface{} } // Liveness implements the
ListenerInterface interface type Liveness struct { StatusUpdater } // NewListener creates a new liveness listener func
NewListener(config Config) (ListenerInterface, error) { updater := StatusUpdater{} if err := config.Validate(); err != nil { return
nil, fmt.Errorf("Error validating config: %s", err. 1cb139a0ed
