You also can access the Tool Palette from the Photoshop menu by selecting Edit ⇒ Preferences (Windows) or Photoshop ⇒ Preferences (Mac OS) to open the Window or System Preferences dialog box. Click the Accessibility tab to access the Tool Palette, as shown in Figure 1-3. **Figure 1-2:** The Tool Palette has been brought to your screen from the Window menu. **Figure 1-3:** The Tool Palette is one of the two tools in Photoshop. Q: Is "beautiful eyes" a common/typical expression for people having?" Is "beautiful eyes" a common/typical expression for people having?" A: The standard expression is "sweet eyes". There is a common misconception, leading to the somewhat derogatory (at least, it is used as such) "glassy eyes" or, worse, "darting eyes". "Fierce or bright eyes" is an obsolete, though moderately popular, variant for "beautiful eyes". "Staring" or "fixed" eyes should really be called "staring" or "fixed" (or "staring eyes"). As to the general expression "having nice eyes", that is not really common. It has a modicum of currency, though. (I am not sure, but "sweet" may have been used in the sense of "charming" or "pretty" as well.) any degree of certainty that the pistol was being carried by the defendant for any purpose. In fact, in the photographs, the gun is lying on a table. While the inferences to be drawn from this fact could be considered by the jury in determining the purpose for which the gun was carried, there is no evidence in the record that the gun was used for any purpose except to permit the defendant to shoot or injure someone. The evidence produced by the state, in the absence of any objection on the part of the defense, is sufficient to sustain a conviction for carrying a pistol or revolver without a license. Under this record, we are of the opinion that the judgment should be reversed and the cause remanded for further proceedings consistent with the views expressed herein. It is so ordered. Have a look at the link, you can use it as a CRUD app. Much faster than any existing open source solution. <http://github.com/juan-esc>
