Quick Heal Antivirus Pro With Key Download

Simplified key creation and decryption with no hassle. Key creation can be done in 3 different ways: by Auto Keys, Customized Keys, and Macro Keys. Also, your key can be decrypted and decrypted to the most popular key formats: DIF and PKC. Here are the key features of KEYMACRO: 1.Key Decryption. Decrypt any files with just one click. After the encryption, you can click the Decrypt button to decrypt the data that was encrypted using a key generated by the key creation features of the software. You can also copy the encrypted data to an encrypted file to avoid copying it. 2.Key Encryption. Encrypt any files in any formats, to have a secure file with sensitive data, such as credit card numbers, banking passwords, or any other sensitive information. 3.Ease of Use. With a simple and easy-to-use interface, you can create your own key within a few minutes. Also, you can easily copy or move encrypted data to any supported format without any fuss. 4.Multiple Encryption. With multiple encryption capabilities, you can create several keys for different purposes or for encrypting different data. 5.Efficient Key Generation. The key generation wizard makes your life much easier by creating keys for you, making it a simple and fast process. You do not need to do any extra effort to create a key to encrypt your data. 6.Multiple Languages. The software supports multiple languages: English, French, Spanish, German, Japanese, Russian, Indonesian, Malaysian, and more. 7.Customized Keys. You can customize your key with any keyword you want. The more keywords, the better. 8.Auto Keys. There are different auto-key creation methods in the program: by Email, by Serial, by Product, by URL, by Task, by Folder, by File, and by Text. 9.Auto Import. The software allows you to upload files, serial numbers, keys, URLs, tasks, and keywords directly from one or more files, email, serial number, URL, folder, and text to generate the key in a click. 10.Auto Encryption. You can use the Auto Encryption feature to decrypt files with an AES 256-bit encryption, which is considered the strongest encryption standard. This option is especially useful for files that have a strong password, such as a license key for a software. 1d6a3396d6
