References Category:Disk operating systems Category:Experimental operating systems Category:Free software programmed in Java (programming language) Category:Proprietary operating systems Category:Software based on Free Pascal Category:Software using the GNU AGPL license Category:Software using the GPL licenseQ: SQL Script to Backup Server I have a server that every day at 2:00am automatically runs a script that daily backs up an sql database on the same server and exports the database to a backup.sql file and then does the same for the night only it runs at 3:00am. I would like to know if it is possible to use sql script to implement this backup. If so how would I do this? A: Since you already have a script to copy the database, you can use that to copy the database, and then run your 3am script. Once your schedule is finished, the 3am script will stop, the copy script will continue, and your 2am script will be skipped. EDIT: Something like this should do the trick DECLARE @TheDBName VARCHAR(MAX) SET @TheDBName = 'dbname' DECLARE @RunDate DATETIME SET @RunDate = '2007-11-01 00:00:00' DECLARE @DateToRun DATETIME SET @DateToRun = CONVERT(VARCHAR(20), @RunDate, 102) + '23:59:59' DECLARE @TimeToRun VARCHAR(MAX) SET @TimeToRun = CONVERT(VARCHAR(MAX), DATEADD(HOUR, -1, @RunDate), 102) + '23:59:59' DECLARE @PathToFile VARCHAR(MAX) SET @PathToFile = 'c:\somepath\scriptname.sql' DECLARE @PathToBackup VARCHAR(MAX) SET @PathToBackup = 'c:\somepath\another\scriptname.sql' DECLARE @BackupName VARCHAR(MAX) SET @BackupName = 'dbname' DECLARE @TheBackupFileName VARCHAR(MAX) SET @TheBackupFileName = 'c:\1cb139a0ed
