Sears is having a pretty rough time in their retail business these days and some of their stores recently got into some trouble when some employees stole merchandise from their stores. Yes, it's common to see employees stealing from their employer, but this is just a little bit too much for us to handle. Keep reading to find out what employees stole and what kind of punishment they got. The story was reported by WFTV in Orlando, Florida. The video below showed Sears employees stealing garments from the store's racks and then shoving them into bags. The only footage we saw was from the side of the store and we didn't really get much of a chance to see what they did, so it's tough to say whether or not they were stealing from merchandise on display or just ripping open bags and grabbing whatever they could. Either way, it's pretty shady that they were stealing in the first place and probably should have been fired for their actions. Click here to watch the video and be on the look out for yourself if you're a Sears employee.

Advertisement While on the topic of employees stealing from their employers, we've come across a few headlines that have caught our attention lately. The Daily Mail reported that a flight attendant had to be taken to a hospital because she was struck in the face by her co-worker's fist. The angry flight attendant wasn't taking any of that and actually went on the attack, striking her fellow co-worker in the jaw. Not only did the co-worker get into a fight with the flight attendant, but she also grabbed some of the flight attendant's belongings and grabbed a small knife. The flight attendant then confronted the co-worker and kicked her in the face. A Florida man was arrested after he and another man were caught illegally holding up a school. Michael

SD Water Mark Full Version For Windows

SD Water Mark is a basic and fairly simple to handle utility designed to help you watermark your pictures in a short period of time. A good companion to free online watermarking services, it helps you stamp your copyright over your photos, selectively, and in a few keystrokes. Features You can also use SD Water Mark with pictures in other formats (JPG, PNG, GIF, etc.), but the automatic conversion of images into the JPG format is not supported. You can enter a text message in the 'Watermark Text' area of the application; the message is displayed in the image preview window. SD Water Mark is able to save your settings to the default location, or to the one you specify. You can also choose whether to save the watermarked pictures or not, and print selected files. Keyboard controls enable you to navigate through your files. You can resize large pictures to 1280x960 pixels. A clean and simple interface makes the program easy to handle, even for newcomers to photo editing software. Watermarking Selective and Drag & Drop SD Water Mark supports the 'Drag & Drop' function, allowing you to add watermarks to multiple images without opening the program. This feature is extremely easy to use and requires only the following steps: Save your pictures on your hard disk and open the application. Select the folder or the file containing the pictures you wish to modify. The picture preview window opens, and click the button to 'Add Watermark'. A search box opens to enable you to find the targeted image. A menu with a 'Select All' option is displayed, making it possible to select multiple files. Images can be added to your folder, or re-arranged in a random order. You have the option of deciding the watermark color, font, size, transparency, and position. You can delete any specific image or group of images, or you can select multiple ones. You can also re-arrange your pictures. Erasing Your Watermark with Regular SD Water Mark enables you to get rid of your selected watermark. Simply select the image, and drag the cursor over the text. If the watermark is not an image, a small rectangle will appear on the picture and the cursor is moved to the watermark. A menu to select 'Erase Watermark' appears.

Sundials were used in navigation for centuries and were a defining characteristic of medieval maps. They were also used in many books of navigation, including highly regarded books such as William Harrison's The Description of England, and the King James Bible. One of the earliest printed maps was printed by the German cartographer Matthiolus. The symbol has a dual meaning: it was also used to locate true north in the absence of a compass, and the Sundial illustrated the Sun in their proper motion across the sky. In South West England, sundials are part of the wider heritage of the languages of Cornwall and Devon: the sundial symbol in Cornish, Duchy of Cornwall, and the sundial symbol in Cornish

language. The sundial symbol is used for many purposes, including gravitational astronomy, navigation, visual navigation, magnetic declination, and area calculation. The sundial symbol is used in the symbols of some scientific societies, including the International Astronomical Union and the International Union of Geodesy and Geophysics. Common symbols In astronomy In chronological order of relative age: The sundial, created by an unknown inventor about 350 BC, probably in Germany. They were used mainly in the field of cartography, navigation and astronomy. The gnomon, a pointed staff with a dial at the top. It was a measuring rod that was pointed to the Sun or moon. The hourglass, an hour-glass-shaped sundial with a movable bottom or the hour-glass
