Programming languages and environments AutoCAD supports several programming languages and environments. The platform supports: an integrated development environment called AutoCAD LT and AutoCAD Pro. As an alternative to using the CAD client, AutoCAD LT and AutoCAD Pro allow direct integration with AutoCAD. These products are available for Windows and Macintosh platforms. AutoCAD LT is free of charge; however, a charge is incurred for the license of AutoCAD Pro for each user, as it provides access to additional features and is used by the default application, AutoCAD. Both can be used in conjunction with other AutoCAD LT and AutoCAD Pro users, which may use the standard product. Visual LISP, a programming language for AutoCAD, is a specialized form of Lisp that is included as a feature of AutoCAD. Microsoft Visual Basic for Applications (VBA) is a basic form of Object-Oriented BASIC (OOB) that allows programmers to create custom macros or functions for AutoCAD. VBA is included as a feature of AutoCAD. Microsoft ObjectARX is a C++ class library that powers the AutoCAD Platform and is distributed with each Autodesk CAD application. Third-party products The Autodesk Exchange Apps gallery allows AutoCAD users to download third-party products that offer solutions to specific types of problems. Autodesk Exchange Apps also includes Autodesk APIs to provide third-party developers access to CAD data and other resources such as detailed product information.
