Fast Zoom Blur Crack+ For PC

-- "Zoom Blur", a free, powerful and easy-to-use fast blur plugin. This plugin offers an improved "Zoom Blur" effect. "Zoom Blur" effect is the photo retouch method that allows you to change size of the image. It acts as a magnification filter, blurring the image in an easy way. "Zoom Blur" effect works in 2 modes: fast mode and normal mode. Use the Edit>Apply>Fast Zoom Blur to apply this effect to the selected area (image corners, edges, etc.). The feature that defines the Zoom Blur effect is that users can set the size of the image through the zoom factor. The factor is the multiplier of the image size and width/height. Now we have fast mode and normal mode. Using fast mode, a user can set a zoom factor of at most 10 times. With normal mode, the zoom factor is set to a full zoom factor (approximately 20 times). This effect only works with Adobe Photoshop plugin which is free to download from You can easily convert PSD file to any.png image by using the online.psd to.png converter at The output file format is.png. Changes from Zoom Blur 1.1 (released on Nov 4, 2005): ------------------------ - added setting for user defined point of origin (right click on the effect and set user defined point of origin) - added setting for setting the selection direction (right click on the effect and set selection direction) - added setting for smart radial method (right click on the effect and set radial method) - added setting for intelligent blur strength (right click on the effect and set intelligent blur strength) - added setting for increasing or decreasing the number of radial steps for each radius (right click on the effect and set radial number of steps) - added setting for minimum blur radius, which prevents the blur from blurring out of the current selection (right click on the effect and set minimum blur radius) - added setting for letting the user specify where to place the blur (right click on the effect and set blur position) - added setting for the zoom blur size (right click on the effect and set zoom blur size) - added setting for translating selection into a blur (right click on the effect and set translate selection into blur) - added setting for b7e8fdf5c8
