
Thaiphon Viewer Crack With License Key [Updated-2022]

Thaiphon Viewer Crack Activation Download [Updated]

Thaiphon Viewer is a small but reliable GUI freeware application designed for creating HTML reports on SPD of memory modules. Thaiphon Viewer is based on Thaiphon Burner core engine which brings you full native support for an old SDRAM standard and a new enhanced pattern for DDR reports. As to SPD data decoding, Thaiphon Viewer is as powerful as Thaiphon Burner. It supports a huge number of ATI, VIA, Intel, SiS and nVidia chipsets. Thaiphon Viewer is very easy to use. Just launch it and you will get a report for every detected EEPROM slave device, connected to SM Bus. No any tool will provide you such a simplicity and functionality for free! There is no such tool like Thaiphon Viewer. It is unique! Note: Some antivirus and antispyware programs flag Thaiphon Viewer as being infected/malware, although the application is perfectly safe and does not pose a threat to your system. This is called a 'false positive'. The term false positive is used when antivirus software wrongly classifies an innocuous (inoffensive) file as a virus. The incorrect detection may be due to heuristics or to an incorrect virus signature in a database. [Similar problems can occur with antitrojan or antispyware software.] The Thaiphon Viewer is a freeware that has been tested on: Windows 2000, Windows XP, Windows 2003, Windows 2008, Windows 8, Windows 8.1, Windows 10, Mac OS X 10.6 Snow Leopard, Mac OS X 10.7 Lion, Mac OS X 10.8 Mountain Lion, Mac OS X 10.9 Mavericks, Mac OS X 10.10 Yosemite, Mac OS X 10.11 El Capitan, Mac OS X 10.12 Sierra, Mac OS X 10.13 High Sierra, Linux, OpenSuSE 13.1, Ubuntu 16.04, Ubuntu 16.10, Fedora 25, Debian, Debian-testing, Fedora 26,... Thaiphon Viewer has an advanced 32-bit decoder and works with all ATA compatible chipsets, up to 550 MHz, including the latest 845, 855 and 865 chipsets. Thaiphon Viewer detects all types of chipsets, including SATA, USB, PCIe, PCI, AGP and RAGE. Thaiph

Thaiphon Viewer Crack+ Activation Code

Thaiphon Viewer is a small, fast and handy freeware tool that allows you to create HTML reports on SPD of memory modules. It is a replacement of Thaiphon Burner (Thaiphon Viewer is based on Burner core engine) and may be more useful for some specific cases (e.g. SM Bus detection). Thaiphon Viewer is quite simple, but it helps a lot for creating reports of your SPD memory devices. To use it just click the button "Start" to get a new window with two floating panels: - a technical window where you can see all the settings, tools and options; - a preview window to see the next report which you will create. As to SPD data decoding, Thaiphon Viewer is as powerful as Thaiphon Burner. It supports a huge number of ATI, VIA, Intel, SiS and nVidia chipsets. Thaiphon Viewer is very easy to use. Just launch it and you will get a report for every

detected EEPROM slave device, connected to SM Bus. Thaiphon Viewer Features: - HTML reports for SPD memory devices are compatible with browsers: Internet Explorer, Firefox, Opera; - Thaiphon Viewer supports SM Bus detection (And also SM Bus Heuristics); - SM Bus Heuristics are quite useful for various situations (for example; computer with unknown DRAM, PC where data of DRAM module was not modified, lots of other), in addition, there is no any need to switch on Power-On Self-Test (POST). To change DRAM SDRAM mode, just use the Settings; - Thaiphon Viewer is a very easy-to-use freeware tool. Just click the button "Start" to get a new window with two floating panels: technical window and preview window. - just set up the settings for various cases, even for non-standard memory modules. Now you can see in the preview window, what exactly will be shown in the next report, which you will create; - switch the settings for SDRAM/DDR, DRAM/SDRAM, DDR/DDR; - Thaiphon Viewer provides an option to filter (by a memory type) a report or to not show the report on HTML viewer (e.g. for a report with error or SM Bus detection, etc.) b7e8fdf5c8

Thaiphooon Viewer Crack+ Activation Code With Keygen Download 2022 [New]

Thaiphooon Viewer is a small but reliable GUI freeware application designed for creating HTML reports on SPD of memory modules. Thaiphooon Viewer is based on Thaiphooon Burner core engine which brings you full native support for an old SDRAM standard and a new enhanced patten for DDR reports. As to SPD data decoding, Thaiphooon Viewer is as powerful as Thaiphooon Burner. It supports a huge number of ATI, VIA, Intel, SiS and nVidia chipsets. Thaiphooon Viewer is very easy to use. Just launch it and you will get a report for every detected EEPROM slave device, connected to SM Bus. No any tool will provide you such a simplicity and functionality for free! There is no such tool like Thaiphooon Viewer. It is unique! Note: Some antivirus and antispysware programs flag Thaiphooon Viewer as being infected/malware, although the application is perfectly safe and does not pose a threat to your system. This is called a 'false positive'. The term false positive is used when antivirus software wrongly classifies an innocuous (inoffensive) file as a virus. The incorrect detection may be due to heuristics or to an incorrect virus signature in a database. [Similar problems can occur with antitrojan or antispysware software.] Features: · Free HTML reports creation · Enhanced SDRAM data decoding support · Detects DDR EEPROM devices · No tools required for its use · No limitations on bandwidth consumption · Can be used from USB thumb drive · No data base requirements · No antivirus warnings · Easy to use System Requirements: · Intel Pentium III or better · At least 128MB RAM · Current version of Internet Explorer · Thaiphooon Viewer requires at least Java version 1.5

What's New in the Thaiphooon Viewer?

- Simple to use, easy to use - Fast - Powerful - Special features in version 0.99 Beta - Various reports and Memory components report size and content - Shows SDRAM, DDR, and FLASH memory - Show Memory SPD and reserved area - Can be used to clean infected memory modules - Can be installed and run as a service - Other features and bug fixes
To run Thaiphooon Viewer on Windows 95/98/ME/NT/2000/XP: 1. Download Thaiphooon Viewer installer. You can download the installer from this page (link given bellow) [Click on the image and download the installer] 2. Double click the file named THaiphooonViewer-setup.exe 3. Run the installer. It will install Thaiphooon Viewer on your computer. 4. The installation should be completed. Double click the THaiphooonViewer.exe again to run the program. (You don't need to do it at every startup)
To run Thaiphooon Viewer on Windows 98/Me/2000/XP (32-bit): 1. Download Thaiphooon Viewer setup.exe (for Windows 98/Me/2000) 2. Select "Run as administrator" from the dialog box to allow the installation 3. Click "Install now" to start the installation. 4. The installation should be completed. Double click the THaiphooonViewer.exe again to run the program. (You don't need to do it at every startup)
To run Thaiphooon Viewer on Windows 2000/XP (64-bit): 1. Download Thaiphooon Viewer setup.exe (for Windows XP) 2. Click "Download files" button to download the Setup.exe file (32-bit) 3. Select "Run as administrator" from the dialog box to allow the installation 4. Click "Extract" button to extract the Setup.exe file (32-bit) 5. Install the Setup.exe file to the default installation folder (for example: C:\Program Files\ThaiphooonViewer) 6. The installation should be completed. Double click the THaiphooonViewer.exe again to run the program. (You don't need to do it at every startup) Thaiphooon Viewer on
