For example, Macworld's Photoshop lesson covers a number of topics, including how to manipulate and fix photos in Photoshop. Although Photoshop lacks an inherent organization system, such as the layers of other image editing programs, a simple classification of groups of pixels and color channels is possible. Another useful tool for color correction and image manipulation is Adobe's Photoshop Lightroom. For its features, see [Lightroom vs. Photoshop](#) and [How to Work with Photoshop Layers](#). Adobe (formerly Art Center) Photoshop CS4 can be downloaded from the Apple App Store for \$69.99. A similar application called Adobe Photoshop Elements provides a free trial version. Open a new document, and select Photoshop CS4 as your image-editing program. Photoshop CS4 can open files from many file-format types, including JPEG, TIFF, GIF, PNG, and PSD. Photoshop CS4 also uses its own file format, and it uses the same File → Open command that opens files in Photoshop CS5 and later. See [File Format Support](#) in the Photoshop CS4 Help. Note: There is no File → Open command in previous versions of Photoshop CS. Tip: You can copy and paste a file from one Photoshop CS4 window to another using the Copy command's location menu or the Open File command, as shown here. [\[Click here to continue.\]](#) In Photoshop CS4, the File menu is used to open new documents, save a new one, or save an existing one with a new name. You can use the various menu commands, and you can open different documents and folders at once by selecting the required File menu options. For example, if you are currently working on a document named Picture_1.psd, then you can open new documents in other locations or save an existing document with a different name (such as Picture_2.psd). For example, to open a new document, choose File → New, and then select PSD from the File Format option. You can save a new document in a different location by choosing File → Save as and then selecting PSD as the format. For example, you could choose Save as PSD and then enter a different location. You can display or hide the File menu by choosing View → File, or press Ctrl+F. In some browsers, pressing Enter opens a new window, and pressing Tab opens the next field in a list of

Q: Why after selecting a row i want to remove the whole row? Possible Duplicate: android how to set divider(a color) in listview row? I am learning android. I want to remove a row as soon as i select it. Currently I am trying to do this but not getting success. Suppose in my Listview i have 3 rows. Top row is shown first. After selecting the row, remove the whole row and show 2nd row again. After selecting 2nd row, remove the entire row and show 3rd row. Code: listview.setOnItemClickListener(new AdapterView.OnItemClickListener() { public void onItemClick(AdapterView parent, View view, int position, long id) { Log.i("Position", String.valueOf(position)); ClickActivity.this.mAdapter.notifyDataSetChanged(); // Toast.makeText(getApplicationContext(), "You Clicked at position:" + position, Toast.LENGTH_SHORT).show(); ViewGroup row = (ViewGroup) view.findViewById(R.id.main2_row); // if(row.getVisibility() != View.VISIBLE) // { // row.setVisibility(View.VISIBLE); // DataData data = (DataData) mAdapter.getItem(position); // String s = data.getTitle();
