Q: Ajax request for pure client side I would like to know is it possible to do pure client side ajax request? I'm already using jQuery and no 3rd party libraries. Is it possible to send request to a server to process it and then return result to client? Thanks. A: Yes, it is possible. A simple example is (there are more ways, for example to do it with ajax protocol of GWT): var xmlHttp = new XMLHttpRequest(); xmlHttp.open("GET", "", true); xmlHttp.send(); alert(xmlHttp.responseText); I am a new BJJ student with a lot of self confidence (trying to inject myself into BJJ in Vitoria is very exciting!), but some weakness at certain points. I have done three private lessons so far on the 3rd of July and all of them have been with a different instructor, but they all felt good. I have learnt some things each time and I feel I have improved. One thing I am still working on is my sparring, I have got the arm bar stuff down to a tee, but my other side mount escapes have been missing, which is a bit frustrating. Another thing I have been working on is my collar tie. I am trying to work my way up from choking to the armbar, which I will do tonight. One thing I have found difficult is getting my inside
