FIFA is a in-house EA studio. The UI is a little strange for someone coming from a purely keyboard/mouse set up. Despite the strange UI controls (you occasionally have to go into menu or a game screen to complete a basic action in the game), there is more realistic physics and sound effects that make it a nice experience for console players on the PC. The dynamic difficulty level and the ability to edit player attributes once they've been created further enhances the realism. Massive, stable online community help dictate the direction of the game you're playing. which I'm aiming to have no affiliation with. FIFA 20 was a decent game. It brought back the spirit of old title 'king of the pitch' fifa/hb licence key - be owned!! I think this will be the second commercial windows game to make the switch to mobile as it's a great transition
