What's New In HIDPoint Media Server?

HIDPoint Media Server is a software application that enables you to log in your iPhone, iPad or iPod touch over the Internet to access YouTube. You can enjoy videos remotely on your computer and sometimes even from your mobile device. Don't worry if you are not a techno guru; as long as you do not live alone, you should be able to enjoy this app without any hassle. With this application, you can do a few things. First of all, you can control YouTube content remotely from your iPhone, iPad or iPod touch. Whenever you want to entertain yourself with content from YouTube, you can do so easily from any smart device. The remote feature is fairly intuitive and could prove to be a very useful tool if you have a lot of things to do at your computer. The program is compatible with any device that is running iOS 6.2 or higher. Any iOS devices that are updated to 6.2 or higher do not need to be jailbroken. When you run the software, you are going to need an Apple account. The same Apple ID that you use to manage your mobile devices should be associated with your Apple ID. This account must be connected to your iTunes store. In the installation process, you will have to choose the Apple ID that you are using as well as the account you want to work with. HIDPoint Media Server Download

link: HIDPoint Media Server Download link: View full description YouTube Remote has been developed to be the ultimate tool that allows you to watch videos from your computer, and even your iPhone, iPad or iPod touch. In other words, it will help you watch videos, movies, tv shows, and other kinds of content on your computer and from your iOS device using the same interface from your computer. When you watch remotely, you will see the entire video in high definition while you can choose to watch in full screen or keep it in the smaller app window at the same time.
