In this study 16 patients with primary fractures of humeral shaft were treated by hyperbaric oxygenation. The average age of the patients was 31 years. According to the Meyers and McBride classification, there were 6 type 1, 4 type 2, 5 type 3, and 1 type 4 fractures. The results were analyzed with Karlsson-Sturman scoring system and were evaluated at the end of the following time periods: 1st-3rd day after surgery, 3rd month after surgery, and 6th month after surgery. Among the 16 patients, 12 patients gained complete union and adequate functional results were achieved in 10 patients. `I am not healthy. I am happy': The testimonies of different people who have used "Saudisation" on the country in a bid to boost its economy "I am now happy that the economy of my country is back on track. I am not sick, I am simply rich." This is how new local currency currency canals, called Raya, introduced by the Saudi authorities, have been described by their beneficiaries. The Arab Weekly Newspaper interviewed these people from all segments of society, who shared their happiness at the genuine initiatives introduced by the Saudi authorities to boost the economy and thus help the country's people, particularly those living in rural areas. Most of the interviewees admitted that when the Raya was launched in their area, he was overwhelmed with joy, especially since the market prices dropped in the same period.
