ImageMagick is a highly efficient, open source program that supports a wide variety of image manipulation programs such as Photoshop, GIMP, and many others. It reads and writes a variety of formats and can be run from command line. It is a powerful resource for anyone looking to do basic image

manipulation. However, if all you need to do is manipulate one type of image, this book will be all you need. # About the Book This book demonstrates how to improve images using Photoshop and ImageMagick. It shows you how to convert, resize, retouch, and create a collage. We also work with the paint bucket and filters to add sparkle, details, and text to images. In addition, you will explore ways to crop and create subtle transformations. You will learn how to use layer styles, make selections, and draw directly on a picture. With this book, you will be able to improve an image in a variety of ways, from simple resizing to creating a collage to

cropping a picture. For the experienced user, we will also explore the paint bucket and filters, and get you comfortable working with layers, selections, and transparency. You will learn how to create a basic collage and how to add effects using layer styles. The content is from my years of teaching and writing about Photoshop and ImageMagick. I offer a series of short lessons that go hand in hand with specific projects. Each chapter in the book begins with a short project. I present a project that requires some learning and a short lesson on how to accomplish the project. This is followed by a step-by-step guide that walks you through the

process. # Who this book is for If you are new to Photoshop, ImageMagick, or the command line interface, this book will provide you with the basic skills you need to easily work with and manipulate images. However, if you are an experienced user, you may find it easier to learn and work with Photoshop or ImageMagick first. # Conventions In this book, you will find a number of styles of text that distinguish between different kinds of information. Here are some examples of these styles, and an explanation of their meaning. Code words

The present invention relates to semiconductor device fabrication and, more specifically, to a bulk transistor formation method in a strained-silicon device. Semiconductor devices have been formed with strained-silicon channels to achieve higher speed operation. Shallow Silicon-Germanium (SiGe) channels are used in strained-Si (SS) technology in which the crystal lattice of the SiGe is made to slightly compress to create a relaxed SiGe layer and a Si channel in the same Si substrate. In a typical SS transistor, the SiGe is embedded in the substrate and acts as the channel

region. The channel is an undoped region having a crystalline lattice that is slightly compressed into the Si substrate. The relaxed SiGe relaxes to near the underlying Si substrate under the effects of thermal processing during SS transistor formation. This allows an Si channel to be formed and diffused into the relaxed SiGe layer, providing a layer of Si having a single crystal lattice. SS transistors formed in an Si substrate will exhibit electron and hole mobilities higher than those in conventional Si transistors. The shortening of the Si channel length is very beneficial to the performance of the SS transistor.Enhancing BMP

signaling with recombinant adeno-associated virus serotype 2 overexpression of Smad1 or Smad5 ameliorates lupus nephritis in MRL-Faslpr mice. Fas (APO-1/CD95) is a cell surface receptor that has been implicated in the initiation of autoimmune diseases by triggering apoptosis of autoreactive lymphocytes. The BMPs (bone morphogenetic proteins) have been identified as inhibitors of apoptosis in numerous cell types. The role of BMP signaling in lymphocyte homeostasis and apoptosis remains unclear, and identification of downstream signaling molecules that mediate BMP signaling in immune cells is a critical question.

In this study, we determined whether the overexpression of BMP receptors in B-cells would alleviate systemic lupus erythematosus (SLE) in MRL-Faslpr mice. Mice overexpressing Smad1 or Smad5 driven by a ubiquitous promoter were generated. We found that Smad1 or Smad5 overexpression delayed the onset of lupus nephritis, reduced the degree of proteinuria, and enhanced the survival rate of MRL-Faslpr mice. Compared with Smad1, Smad5 overexp

In his first-ever interviews, the sole Australian survivor of the

Waco siege has revealed to 60 Minutes what really took place during the 51-day stand-off, and why he believes crazed cult leader David Koresh will one day return to Earth. Marcia Clark was a prosecutor who argued before a jury in the case against O.J. Simpson that got him off the hook for the murders of his ex-wife and her friend. She was also a mother who put her kids ahead of her own career, and who drank throughout the case. "I was a prosecutor on the Simpson case," Clark said during her trip to Sydney on The Today Show. "There was one time in the middle of a night when I was a mother and I felt so exposed. I asked [my son] what time it was,"

she said. "He said, 'Mom, it's 2:30'. And I said, 'Where are the guys?' I could picture them out in the yard probably playing with their guns and killing animals." "And he said 'Oh, they're home.' They had changed the clocks." When quizzed about why she thinks Koresh was so compelled to bring his own people to the compound, she told The Today Show she believes the guru had an eye on the market. "I thought about times when I have been in trouble with the law," she said. "I was 23 at the time of the Simpson case. And I remember thinking that all that I'd learned [in law school] was not working. "I was living in a little town in Montana and my husband

was in the Navy. I had this baby. You know, I was just making the best of a bad situation and in a moment of desperation I took a legal job. "It was a moment when I felt if I played my cards right, I could get out of that situation." But Clark has nothing but sympathy for those who were inspired by David Koresh to take part in the 1993 Waco raid. "It's really a crying shame that people listen to the way they do. But I don't have the answer for that. "I am sorry for them. I am sorry for the children that were hurt, the families that were hurt. I know what they went through."
