## **What's new:**

- **Welcome to “Possessions”** - Possessions is the game’s signature system. It measures and grants player, team, stadium and ball goals as well as assists, so it’s up to you to turn possession into goals and assists for your team.
- **New Dribble Animation** - Dribble animation is a real leap forward in Soccer video games. In the past, dribbling was treated like a one-on-one duel between real-life players. In reality, players are more often going in for the tackle, or trying to find space with their ball carrier, so slow motion and completely fake dashes are too unrealistic.
- **Keepers Indivisible** - You’ve always been able to bump into the goalie at the last second, but now it’s official - keepers will often stay where they’re positioned and you’ll have to direct your shots.
- **Commentary Enhanced** - Commentary has always been a key component of FIFA games. We’ve added new camera angles and commentary for 20 sequences during this year’s biggest matches, including England vs Slovenia.
- **Goal Review** - Goal Reviews enable you to check the quality of the goal and red card by either viewing the replay, talking to a referee over the PA system or using a new observer view.
- **Match Engine Updates** - We have been able to re-use our match engine to create more realistic movements. Now you can see players' real agility when they’re turning, running, passing and shooting.

**Advanced Tactical Maneuvering** - Make the right tactical and strategic decisions to unlock Champions in different game modes. Better management of game-flow will result in more goals, more champions.

**Dynamic Player Trajectories** - With the continued advancements in the new engine, players will be forced to stay on the ball or drift out of position if they don't. Make them run out of space and work over the top of defenders to create goals.

**More Grass Physics** - Feel the lushness and realism of player-generated grass with rich rendering and refined simulation. Players step on the turf, and new grass physics give players more control.
